## AFT FRICTION<sup>®</sup>

ADVANCED FRICTION TECHNOLOGY

Earlier the technology used for Brake Shoe Lining had Rubber or Asbestos as the base material. However due to environmental concern and regulations the

technology was upgraded to Asbestos Free Technology. Products are being manufactured with the use of organic Asbestos Free compound.

# Quality

Q

---

*Our quality system covers the entire process, from the first contact with the potential customer to design, to production, to after sales service. FTA provides a pro-active approach to quality assurance which starts during the design and development phase and includes value-added engineering as well as continuous product and process improvement. The quality assurance program continues throughout all phases of all production programs.*

*Our quality system is customer focused and ensuring the best products are delivered meeting clients' requirement. We understand clients requirement in detail and institutionalise them in the form of quality assurance processes.*

**Truly  
TechnoMotive®**
